Agentic AI Fundamentals: Architectures, Frameworks, and Applications

Saikat Chakraborty

Technical Lead | Node.js | React.js | Python | AWS | WebRTC | Full-Stack Engineering

Bangalore Urban, Karnataka, India

Summary

Technical Lead with 14+ years of experience building and scaling web applications across full-stack environments.I specialize in leading cross-functional engineering teams, driving architecture decisions, and delivering robust solutions using Node.js, React.js, Python, MySQL, and PostgreSQL.Over my career I have:- Built real-time computer vision platforms for workplace safety and PPE compliance- Architected WebRTC-based video conferencing for geographically dispersed field teams- Delivered workflow automation backends for enterprise collaboration tools- Led end-to-end development, testing, and production deployments across multiple products- Mentored engineers and managed teams across fast-paced product environmentsTech I work with:Languages: Ruby, JavaScript, PythonFrameworks: Ruby on Rails, Express, Flask, React.jsCloud: AWS (EC2, RDS, S3, SES, Lambda, Dynamodb CloudWatch, CodeBuild, CodeDeploy, CodePipeline)Databases: MySQL, PostgreSQL, MongoDBOther: Docker, WebRTC, WebSocket,, Stripe, Nginx, GitOpen to connecting with engineers, tech leads, and product teams working on impactful problems.

Experience

Telepresenz

Technical Lead

February 2019 - March 2026 (7 years 2 months)

India

Leading architecture and delivery for computer vision and real-time collaboration platforms serving industrial field teams.

- Lead architecture decisions and end-to-end delivery across multiple product lines
- Manage and mentor cross-functional engineering teams, driving code quality and best practices

- Own cloud infrastructure on AWS including provisioning, deployment pipelines, and monitoring

Projects:

SmartEye — PPE Compliance & Workplace Safety Platform
Built REST APIs for real-time face and object detection, enabling PPE compliance monitoring across field teams. Implemented real-time geo tracking of frontline workers to reduce human casualties on job sites.

SmartOps — Field Collaboration & Workflow Automation Platform
Architected WebRTC-based video conferencing feature supporting geographically dispersed field teams. Planned and developed the backend for the workflow automation module.

Velankani Communications Technologies
Senior Software Engineer
April 2016 - February 2019 (2 years 11 months)
Bangalore

Led requirement gathering, technical planning, and team management across multiple product tracks.

- Oversaw development, testing, and production deployments for client-facing web applications
- Conducted requirement gathering sessions and managed the engineering team
- Drove technical decisions across IoT, API, and employee management platforms

Projects:

Vconnect — Employee Management Tool
Led end-to-end development, testing, and production deployment of a web-based tool for project allocation, timesheet, leave, and performance management.

Sponsored Data Exchange — Mobile Data API Platform
Delivered development, testing, and production deployment of an API platform managing sponsored mobile data for end users.

Itank — IoT Tank Monitoring Application
Enhanced and maintained an IoT application for smart monitoring of liquid transport tanks. Authored functional and unit test cases to improve code coverage.

Evon Technologies
Software developer
July 2014 - March 2016 (1 year 9 months)
Dehradun, Uttarakhand, India

Contributed to development and enhancement of web and mobile applications across multiple client projects.

- Findnerd — Contributed to bug fixing and feature enhancements on a project management and Q&A platform for professionals
- Uvent — Resolved bugs, improved application stability, and authored unit tests for an iPhone app for local issue reporting
- WorkHorse — Developed REST APIs for a job posting and hiring platform's iPhone application

Circar Consulting Services Pvt. Ltd.
Software Developer
May 2011 - July 2014 (3 years 3 months)
Greater Kolkata Area

Contributed to vertical development across a range of web applications in healthcare, events, and property management domains.

- Property Management System — Vertical development and Devise Authentication implementation
- Eliteteam — Feature development for a SaaS project management tool using SCRUM methodology
- Crossfire — Built and delivered features for an event organization platform
- Captureproof — Contributed to a HIPAA-compliant platform connecting patients and doctors
